ACADEMIC PROJECTS

Spectra ASD – Autism Screening Platform

Designed and developed a web-based intelligent screening system for early detection of Autism Spectrum Disorder (ASD) Integrated ADTree machine learning model with caregiver questionnaire data for predictive analysis Generated analytical reports to assist psychologists and healthcare professionals Extended the system with real-time video analysis to observe non-verbal behaviors such as eye contact duration and facial attention Focused on building a cost-effective and accessible solution for families and healthcare centers

Smart Move – Web-Based Home & Office Relocation System

Developed a user-friendly web platform to simplify home and office relocation services Connected customers with verified service providers for packing, loading, and transportation Implemented the interface using HTML and Bootstrap with basic backend logic Improved transparency through real-time booking updates and service coordination

WORKSHOPS & TRAINING

11/2024	Data Science with Python Techmaghi & IIT Hyderabad
10/2024	Python Hands-on Workshop Neovent Innovations
10/2024	Machine Learning Hands-on Workshop Neovent Innovations
09/2024	Idea to Product – Innovation & Product Development AICTE Innovation Centre
08/2024	Python Full Stack Workshop Infomakes IT Infrastructure
08/2024	Intelligent Web Application Workshop Infomakes IT Infrastructure
04/2024	Artificial Intelligence with Python Techmaghi & IIT Kharagpur
